-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on August 11, 2005 has been entered.

Terminal Disclaimer

The terminal disclaimer filed on August 11, 2005 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent No. 6,865,859 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 26, 29, 31, and 34 are rejected under 35 U.S.C. 102(b) as being anticipated by Foy. Foy discloses, Figs. 1-8, using dimensioned form-work panels 7 with a corner bracket 1 in making a dimensioned building member. An outer surface of the bracket body, as along 3 or 4 or 5, contacts the form-work panels and is connected thereto. The outer surface of the bracket is configured to impart a shape to the building member as along 2. The recitation of "U.S.-dimensioned" or "metric-dimensioned" does not define any structure or feature differing from what is disclosed within Foy. The terms "U.S.-dimensioned" and "metric-dimensioned" only serve to define any given dimension. The corner bracket of Foy can be utilized with any given dimension of panel, (i.e., any given dimension of length, width, and thickness). Therefore, no differentiation is made between the language of the instantly rejected claims and Foy. The rejected method claims merely define a corner bracket assembled to a panel or panels. Indeed, Foy discloses a plurality of dimensions of building member as, for example, in Figs. 5, 6, and 7. Foy discloses "using the conversion corner bracket, by disposing the conversion corner bracket between at least two of the plurality of...form-work panels 7 such that the bracket body outer surface 2/3 contacts the at least two form-work panels".

Response to Arguments

Applicant's arguments filed August 11, 2005 have been fully considered but they are not persuasive. As set forth in the above rejections Foy discloses "using the conversion corner bracket, by disposing the conversion corner bracket between at least

two of the plurality of...form-work panels such that the bracket body outer surface contacts the at least two form-work panels”.
